

TV INSTRUCTIONS

You do not need a cable box to access these channels, you should be able to plug your TV directly into the wall with a standard coaxial cable* and begin watching.

NOT GETTING ANY CHANNELS?

Your TV must be equipped with an “HRC” digital tuner in order to receive these channels. Most TV’s manufactured after 2010 have this tuner, however, there are some that do not. If you think your TV has an “HRC” digital tuner and you are not receiving any channels, please try the following steps:

1. Go to your Menu
2. Go to Options/Settings
3. Go to Tuner/Frequency
4. You should see different selections such as “Standard”/”HRC”/”IRC”
5. Select “HRC”
6. Run a channel scan

Please note, the channels will look like decimal points rather than normal channel numbers.

If you are still unsuccessful after trying these steps, please contact your RSO for further assistance.

**Cable cords are not provided by UCR Housing, and may need to be purchased.*
